

Blinkit, Zepto and Instamart each have a different weak spot

I read what 2,650 recent 1★–2★ Play Store reviews say about the three apps, over the same eight days.

 Blinkit Zepto Instamart

Same eight days. Very different volumes.

1★-2★ Google Play reviews in English, 21-28 September 2026.

● **Blinkit**

1,724

complaints · 788 name a specific problem

● **Zepto**

629

complaints · 403 name a specific problem

● **Instamart**

297

complaints · 156 name a specific problem

More complaints mostly means more users, so the rest of this compares **shares**, not counts.

● **Blinkit**

The full picture

Share of specific complaints that mention each problem, 21–28 Sep 2026.
Darker = higher for that row.

A complaint can mention more than one problem.

What I take from it

- No app wins everywhere. Each one's weak spot is another's strength.
 - **Blinkit:** an ETA customers can trust matters more than a faster one.
 - **Zepto:** let a photo settle simple item issues inside the chat.
 - **Instamart:** show expiry dates before checkout, as one reviewer asked.
