

Treebo

What guests booked, and what they got

Treebo’s Play Store rating over two years, what recent complaints have in common, and one idea for the handoff between app and hotel.

BOOKED VIA APP

SEP 2026

BOOKED

Room with breakfast

AT THE DESK

“breakfast not included”

From a 1★ review, 2 Sep 2026. The guest shared a screenshot of the booking.

4.7★ → 2.6★

average rating, early 2025 against Jul–Sep 2026

1 in 3

specific complaints since mid-January say the stay didn’t match the booking

2 in 3

specific complaints mention support being hard to reach

Product Analyst · apratim1424@gmail.com

Since early 2025, Treebo’s rating has gone from 4.7★ to 2.6★

Every English review on Google Play since October 2024 is in this data, so these averages are complete. Reviews also became much rarer, so the mix of reviewers may have changed too.

AVERAGE RATING BY QUARTER • ALL ENGLISH REVIEWS

7% → 58%

share of reviews rated 1★–2★, Q4 2024 against Jul–Sep 2026

728 → 40

reviews per quarter over the same period

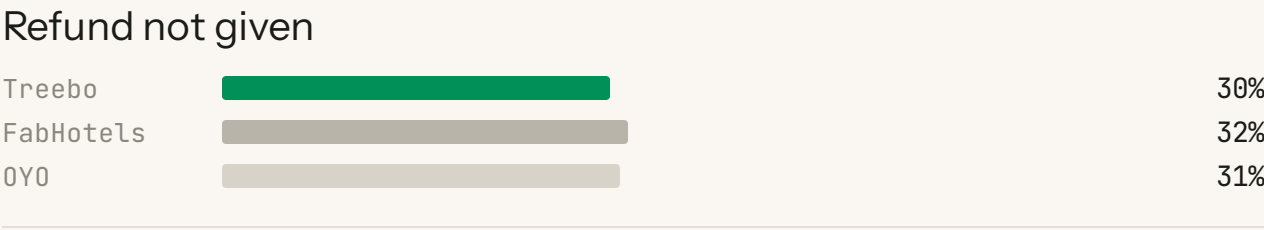

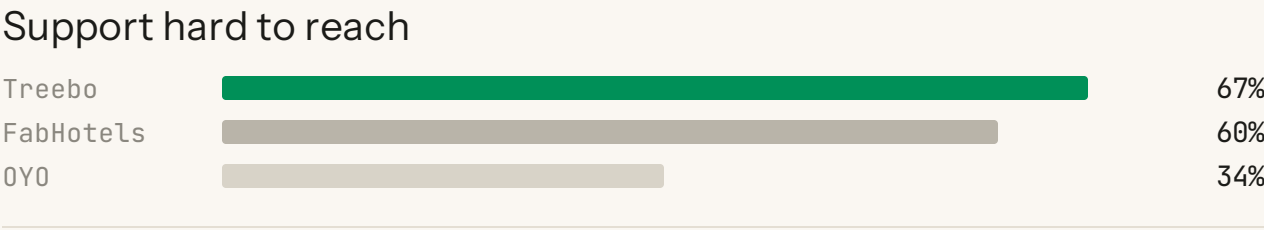

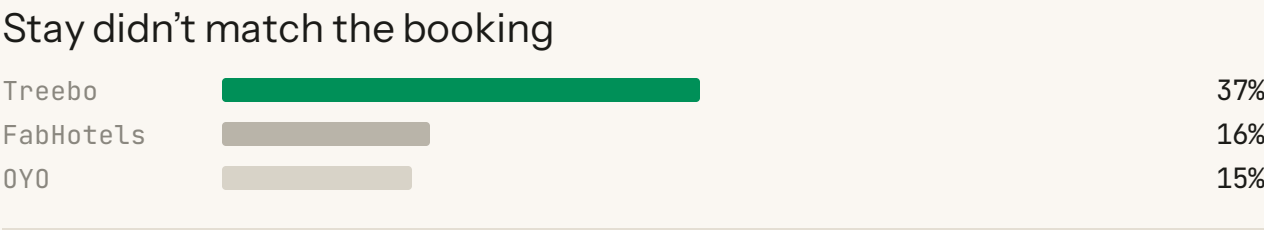

“Used to be good. Now terrible. What a fall from grace.”

1★ review • 20 Apr 2026

The most common complaint: *the stay didn't match the booking*

WHAT THE GUEST BOOKED	WHAT THE HOTEL SAID OR GAVE	1★ REVIEW
Room with breakfast, paid for	<i>“they say the breakfast not included”</i>	2 Sep 2026
3 guests (2 adults, 1 child)	<i>“it’s showing only 2 guests”</i>	19 Apr 2026
A confirmed, paid room	<i>“the hotel called saying all rooms were full”</i>	30 May 2026
The price shown before paying	<i>“after payment confirmation they changed the pricing”</i>	17 May 2026
The room seen at the hotel	<i>“those rooms for offline bookings only and not for online bookings”</i>	1 Sep 2026
Beach view, ₹2,500 extra	<i>“the hotel staff told me there was no beach view”</i>	31 Aug 2026

SHARE OF SPECIFIC COMPLAINTS · 15 JAN – 28 SEP 2026

Specific = names a problem: Treebo 46, FabHotels 145, OYO 791. Treebo's numbers are small, so read them as a direction.

Make the booking *the promise the hotel keeps*

Treebo runs about 750 hotels in 120 cities and is growing into the mid-market (Skift, Sep 2025). The more partner hotels there are, the more the app-to-desk handoff matters.

1	The hotel confirms what was sold	Within minutes of booking, the hotel sees exactly what the guest paid for: guests, meals, room type. It confirms, or the app offers another hotel before the guest travels.	<i>“the hotel called saying all rooms were full”</i>
2	Pause sales on hotels with repeat mismatches	When a hotel collects “not as booked” reports, stop selling it until it’s fixed.	<i>“they received multiple complaints about this property”</i>
3	A booking card to show at the desk	Everything promised, in one screen the desk can check, with a one-tap “Not as booked” button that gets a call back.	<i>“Even i shared the Screenshot, still they’re unwilling”</i>
4	Refund unused add-ons automatically	If breakfast or a view was paid for and not given, refund it without a support chat.	<i>“I asked for a refund ... not giving refunds”</i>

HOW I’D KNOW IT WORKED

“Not as booked” reports per 1,000 check-ins, by hotel, every week.
Guardrail: hotels don’t cancel more bookings once they must confirm what was sold.

WHAT I CAN’T SEE

How bookings reach hotels today. Some of this may already exist; treat these as starting points.
