EDUCATION

Program	Institution	CGPA / % / Grade	Completion
B Tech Computer Science (CCVT[1])	University of Petroleum and Energy Studies	7.4	2027
AI Product Management Fellowship	Next Leap	Top Fellow	2026

PROFESSIONAL EXPERIENCE

Product Intern
WisdomCircle
May 2026 - Jul 2026

Owned the weekly feature analysis cadence for 20+ shipped stories across 6 monthly release cycles, working with product, engineering, and QA from adoption measurement to pre-release sign-off.

- Analysed adoption, completion, and drop-off across **4 core product surfaces** spanning recruiter onboarding, team invites, application flows, and role visibility, translating funnel behaviour into **weekly Scale/Iterate/Monitor recommendations** for the Product Lead
- Investigated **application and profile-download journeys** through **Fullstory** session segmentation, isolating device-specific abandonment points that aggregate completion-rate metrics had concealed
- Partnered with engineering and QA on release readiness, validating sprint builds against a **2,000+ case regression suite** and documenting reproducible defects with expected-versus-actual behaviour
- Standardised post-release reporting and issue-tracking documentation in **Notion**, giving the product team a consistent weekly view of feature performance

Operations Intern
Hashmint
Aug 2025 - Oct 2025

Owned end-to-end business-to-business outreach for the India 1000 Scholars Olympiad across 3 cities, from cold pipeline build through closed registration revenue.

- Drove **₹2L+ in registration revenue** across 80+ schools and coaching institutes in Kota, Jaipur, and Dehradun, owning the full sales cycle from cold outreach to close
- **Pitched directly to directors and owners** across 30+ on-ground institutional visits, **opening enterprise-level conversations with Allen and Unacademy**
- **Built the outreach CRM** and follow-up cadence from scratch, tracking 80+ accounts across calls, email, and WhatsApp with no existing process to inherit
- Partnered with sales and operations to convert field-level objections into localised engagement frameworks, adapting positioning city by city

Data Intern
HNP+ Organisation
Jun 2024 - Jul 2024

Handled beneficiary-data operations and government liaison for a public-health outreach program, working across DM offices, field sites, and community stakeholders.

- **Coordinated with District Magistrate offices and Government of India** departments to source the scheme records required for field outreach
- Maintained registration, entry, and tracking workflows for **1,000+ confidential beneficiary records** across multiple field locations under prescribed privacy protocols
- Reviewed **field-collected data to identify enrollment gaps**, informing where awareness efforts were directed and maintaining reporting accuracy throughout

PROJECTS

Anthropic Claude GroundWork
End-to-End Product

Designed a workflow guidance layer letting Claude declare its execution approach before responding to complex tasks.

- Found through **4 user interviews and 47 survey responses** that users abandoned complex AI tasks over approach opacity, not output quality, which was blocking Skill adoption
- Designed a **pre-response declaration layer** with contextual Skill recommendations, defining **north star, L1, and L2 metric trees** spanning Skill adoption rate, approach confirmation rate, and session return behaviour
- Linked feature adoption to **retention and paid-plan conversion** through a monetisation and experimentation framework, scoping side-by-side response comparison as the primary activation lever

Stuck Money (UPI)
Payments Proposal

Proposed a hold, link, settle layer for UPI payments left unconfirmed by the receiving bank, so merchants recover the sale and not just the money.

- Sized the problem from **NPCI receiving-bank data (Jan 2024 - Aug 2026)**: **79.4 lakh payments a month** go unconfirmed in real time, as volume growth offset most of the fall in rate (8.8 to 3.4 per 10,000)
- Traced the gap to NPCI allowing **at most 3 status checks with no gap set**, then designed five changes within those limits, including a **"pending" state with a time** instead of "failed" and linked second payments with auto-refund
- Chose the full fix over a pending-screen-only option via **RICE**, defined a **Saved Sales Rate** north star with 4 L1 drivers, and scoped a **4-week 50/50 test** with a clickable prototype

Quick Commerce Review Analysis
Research

Read 2,650 recent 1-2 star Play Store reviews and found Blinkit, Zepto and Instamart each break in a different place.

- Compared **shares of specific complaints** rather than counts across 21–28 Sep 2026 reviews (Blinkit 1,724, Zepto 629, Instamart 297), sorting themes with keyword rules **hand-checked to about 8 in 10 correct**
- Found Blinkit's ETA slipping past the promise (17%), **Zepto support in 44%** of specific complaints (Blinkit 23%), and **Instamart item quality at 28%**
- Recommended one fix per app: a **trustworthy ETA over a faster one** for Blinkit, photo-based resolution in chat for Zepto, and **expiry dates before checkout** for Instamart, delivered as a 7-slide carousel

App Review Pulse
AI Build

Built an AI engine that turns thousands of app reviews into a weekly one-pager for product, growth and leadership.

- Takes a CSV of the **last 12 weeks of App Store and Play Store reviews** and uses an LLM call to **group them into product themes** (5 themes auto-grouped)
- A second LLM call drafts a scannable pulse note **under 120 words**, emailed weekly
- Structured as a **four-stage pipeline** (input, analyse, draft, send), with analysis and email drafting split across two separate LLM calls

POSITIONS OF RESPONSIBILITY

Secretary
Manoshakti - Emotional Well-Being Club
Aug 2023 - Jun 2025

Led the club for 2 years, owning event execution, budgets, and university-level approvals across a student team.

- Secured administrative sign-off for campus-wide events by presenting **structured proposals to CXOs and senior university administration**, clearing the approvals bottleneck that capped event scale
- Managed **₹35,000+ in budgets** across logistics, resource allocation, and compliance, delivering events reaching **10,000+ cumulative student footfall**
- Built documentation and process standards for the club, mentoring junior members so execution quality held across annual handovers

RELEVANT COURSEWORK AND SKILLS

Product	User Research, Problem Framing, Product Strategy, Prioritisation (RICE), PRD Writing, Journey Mapping, Roadmapping, QA & Regression Testing
Analytics	Metrics Definition (North Star, L1/L2), Retention & Cohort Analysis, Event Tracking, Session Analysis, Experiment Design, SQL
AI	LLM Applications, Prompt Engineering, Eval Design, LLM-as-Judge, RAG, AI Agents & Protocols
Technical	Python, System Design, APIs & Microservices, DBMS, AWS, Containers & Kubernetes, Distributed Systems, Networking
Tools	Metabase, Fullstory, Figma, Whimsical, Notion, Git & GitHub, Excel

* Ongoing [1]Cloud Computing and Virtualisation Technology
